Curriculum Vitae

Objective

Taking place in an action of what I've gained from my professional career is, not staying 'stable'.

Binding contemporary approach with innovative diciplines is the main basis of progress in my career.

Using different types of application techniques gives a unique idendtity to every project. The role of an architect has to be provide full functioning and aesthetic work of arts to the environment.

Architects have sacred duty and responsibility of fullfilling the society's needs and desires. The main aspect of any design has relation with nature generates fundamentals of shaping the world.
